RE: Sara Schuster

To Whom It May Concern:

It is with great pleasure that I write this letter of recommendation for Sara Schuster. Sara has been a graduate social work student from the University of Michigan with me since September 1992.

During her practicum she has helped service the students at Scotch Elementary two and a half days a week. Her assignments have included individual and group counseling, parent meetings and staff consultations. In addition Sara has learned how to chair MET meetings, "504" meetings and IEPC meetings. She has attended and contributed at child study meetings and has been involved in writing and implementing behavior management plans. Most recently she has learned to conduct "MAPS" meetings (McGill Action Planning Systems) for the transition of more severely impaired students to be included in the regular education classroom.

Sara works very well with both students and adults. Her personality compliments her intellectual ability and reflects her genuine concern for the individual. She is energetic, creative and willing to try anything asked of her. She is punctual and flexible and works well with teams of other professionals.

I feel she would complement any special education staff and I recommend her highly.

Sincerely,

A handwritten signature in cursive script, appearing to read "Anne E. Evans".

Anne E. Evans, MSW
School Social Worker
